

Features and Benefits

"You won't believe it's not a Magnet"

- ü Makes any Golf Club into a Retriever.
- ü Lightweight Compact and Durable – weighs less than 3 ounces, has a total length of less than 5 inches and is anodized for strength and resistance to corrosion.
- ü No moving parts – never wears out.
- ü Attaches to the outside of golf bag similar to a golf towel so it doesn't take up valuable golf bag space or damage Club Heads.
- ü Innovative Head design allows either side to retrieve a ball. *NO Scooping is Required*. Simply place the retriever Head on a ball using a slight downward force. The Head will attach itself to the ball.
- ü Picks up golf balls easily from: water, grass, rough terrain, difficult to reach areas, under trees, through a chain link fence or the hole after a putt.
- ü Works the same in all weather conditions – not affected by heat, cold or moisture.
- ü Can be stuck in the ground so that the ring can be used to hold the grip of a putter away from wet Grass.
- ü Makes a great tool for drawing a straight line around the center of a ball to aid putting alignment.
