

## Frequently Asked Questions

*"You won't believe it's not a Magnet"*

**Q:** How long can I expect my MAGNOT golf ball retriever to last?

**A:** **The Magnot has no moving parts and will never wear out under normal conditions. The holder is made of Nylon and the Patented Retriever Head is made from anodized aluminium.**

**Q:** The golf course I belong to doesn't have any water hazards so why do I need a ball retriever.

**A:** **The MAGNOT picks up golf balls easily from difficult to reach areas such as: under trees. rough terrain, through a chain link fence or the hole/cup after a putt.**

**Q:** Will the MAGNOT retriever damage the grips on my golf clubs?

**A:** **The spike on the head of the retriever has been carefully designed to create a friction fit in the end of the club with out damaging the grip.**

**Q:** By getting my Golf Club grip wet when retrieving a ball from water reduce the life of my grip?

**A:** **It will help increase the life of the grip because when you dry it off you will remove the sweat and oils produced by your body that ultimately reduce grip life.**

**Q:** Will water enter the shaft of my club when retrieving a ball from water

**A:** **The spike on the head of the retriever plugs the hole in the grip creating a watertight seal that will prevent any water from entering the shaft.**
